ANIMAL GENETICS & RESEARCH

SERVE THE FARMER SERVE THE NATION

We Together Revolutionize The Breed Improvement ...

HISAR SPERM BIOTECH

ANIMAL GENETICS & RESEARCH

SERVE THE FARMER SERVE THE NATION

ACKNOWLEDGEMENT

Hisar Sperm Biotech [HSB] is an indigenous state of the art bull semen station located in Hisar, Haryana and was established keeping an eye on the livestock farmers of India. The population of India is increasing drastically hence the demand for the milk and milk products also increasing. As it is known milk is a complete food and to meet the demand of milk, breed improvement of milch animals is necessary.

Artificial Insemination [A.I] Technique is a very good means of breed improvement as well as employment to the youth of India. Milk production capacity of animal is a genetic trait and the selection of a highly genetically merit bull can be directly accelerating the breed improvement program.

Earlier the breed improvement program could not have been accelerated without artificial insemination technique because a bull could conceive only one cow or buffalo at a time. But through A.I Technique more than hundred cows or buffaloes can be conceived from a single semen ejaculate of that genetically merit bull. The small size of straw in which semen is stored can be easily sent to a remote location and the bull remains in its place. This technology has made breed improvement a lot easier and faster.

HSB was created in 2021 under the government of India's scheme START UP INDIA. We select the highly merit bulls of different breeds from different parts of India. In bull's selection all parameters are taken care of like genotype, phenotype, disease free and his pedigree. Livestock farmers, veterinarians and breeders gives us full cooperation in bull's selection at their own level. We are deeply grateful to them.

HSB's Hi-Tech Semen Processing Lab is designed as per international standards. Laboratory's highly qualified staff, doctors and semen processing German equipment's guarantees uncontaminated semen and excellent sperm quality.

Hisar Sperm Biotech is an ISO 9001:2015 & GMP certified bull semen station and trying in the government of India's campaign to double the income of farmers through breed improvement of milch animals

The Motto of HSB is:

SERVE THE FARMER SERVE THE NATION
